11. (Twice Amended) A method of controlling a print system, comprising the steps of:
- gathering a status of a plurality of printers with a print server; and
  - sending the gathered status of the plurality of printers to a plurality of computers connected to the print server, the status being displayed at each of the plurality of computers.
22. (Amended) A print server adapted to be connected to a plurality of printers and a plurality of computers, the print server comprising:
- a job observation module for monitoring and gathering the status of the plurality of printers; and
  - a device for notifying each of the plurality of computers of the gathered status of the plurality of printers.
